

Our Goal

Our goal as teachers is to inspire children to become lifelong learners. We allow them opportunities to become successful. We teach them self-respect and to respect their environment and the world around them. We teach them independence and responsibility so that they can have a full, meaningful, and peaceful life.

Curriculum

Our core curriculum is based on **Montessori** practices and principles, but we customize it with our own unique styles that have been proven successful in our school for many years.

Our Pride

Our children attained commendable rankings in the prestigious **Math Kangaroo International Mathematics Competition**, surpassing over 6 million participants globally.

**We prepare
children for life**

Our Primary curriculum goes beyond reading, writing, math, and science; we prepare children for life

LANGUAGE ARTS

Reading

Children will learn to understand literature and informational text. They will participate in reading groups according to their reading level and identify main topics and supporting details.

Writing

Students will write informational, narrative and opinion pieces, develop writing, that is focused and well organized using correct punctuation.

Spelling

Children will have weekly spelling tests.

Word Study

Children will learn about prefixes, suffixes, antonyms, synonyms, homonyms and ABC order.

Speaking

We will have presentations in class and performances throughout the year.

Grammar

Through interactive lessons, exercises, and activities, young learners will gradually grasp the rules and principles that govern the language they speak and write.

MATHEMATICS

Our children learn about numbers through touching, moving, and quantifying physical objects. We introduce them to number sense—basic concepts, units, tens, hundreds and thousands. They will learn, math facts and operations, geometry, fractions, problem solving, as well as money, time and graphing. Children will learn to use logic by practicing critical thinking.

GEOGRAPHY

Children will delve into the study of continents and their countries through making maps and studying the cultures and religions from each area.

SCIENCE

Your child will learn astronomy and basic forces in our Universe. They will study atoms, periodic table of elements, as well as The Five Kingdoms and geology of the Earth.

SOCIAL AND EMOTIONAL SKILLS

Children will have guided practice in self-awareness, emotional awareness, emotional regulation, respect for self and others, self-control, cooperation, and team building.

PHYSICAL EDUCATION

Children build their hand-eye coordination through various sports and games and develop their balance, stability, coordination, and body awareness through yoga and dance.

ART

Your child will explore art as a process. They'll develop their artistic expression using various mediums, including paint, collage, crayons, pencils, and textiles.

MUSIC

Sarodgini children learn that music is not only fun to sing but that it also makes use of various structural components, including tempo, rhythm, dynamics, echo, and pitch. Choreographing songs with movements refines children's fine and gross motor skills while supporting memorization and group participation. These skills are all demonstrated each year at our annual Winter Performance.
